

SAMMYING MACHINE LANA AW

The LANA AW is perfectly suited for the dry-pressing of all types of fur skins, especially for lamb- and sheepskins (approx. 150 - 300 skins per hour).

A conveyor belt feeds the furs towards the pair of rubberized main sammying rollers. The upper roller is covered with an automatically controlled felt sleeve. The pressure of the rollers is adjustable depending on the kind of skin.

The fur skins leave the machine at the rear over a conveyor belt in a drained, flat and free from creases condition.

All parts of the machine are made of stainless steel, of synthetic material or are synthetic covered. The solid construction of the machine allows permanent working. After short briefing even unskilled staff can work on this machine.

Technical data:

LANA AW

Working widths: 120 cms / 140 cms / 160 cms

Dimensions of machine:

LANA AW120

width: 220 cms
depth: 170 cms
height: 180 cms,
weight: approx. 1200 kgs

LANA AW140

width: 240 cms
depth: 170 cms
height: 180 cms,
weight: approx. 1400 kgs

LANA AW160

width: 260 cms
depth: 170 cms
height: 180 cms,
weight: approx. 1600 kgs

Connected load: approx. 2,5 kW, 400 volts, 3 phase
