
BUFFING MACHINE LANA SCH

The buffing machine LANA SCH is especially engineered for cleaning the leather of closed and open fur skins of all kinds.

The buffing drum is coated with emery paper and buffs the leather evenly and tidily; the accruing dust is sucked off by an exhauster.

Simple operation, easy exchange of the emery paper of every grade, quiet running, ball bearing main shaft, casing to be swiveled sideways, and feeding table. These features make this efficient machine indispensable for every dresser's workshop.

Technical data:

LANA SCH

Working widths: 60 cms / 80 cms / 100 cms / 120 cms

Dimensions of machine:

LANA SCH 100

width: 160 cms
depth: 100 cms /
height: 110 cms /
weight: approx. 220 kgs

Connected load: approx. 5 kW, 400 volts, 3 phase
