

ROPING MACHINE LANA TRW

The LANA TRW is a through-feed machine for stretching and roping mink, with 3 vertical and 2 horizontal pairs of rubber rollers. The stretching is effected by an increasing peripheral speed and the milling by the alternately vertically and horizontally arranged rubber rollers.

The spring pressure onto the flexibly mounted horizontal and vertical rollers is to be adjusted separately and thus may be adapted to the thickness and the processing condition of the fur skins.

A safety switching device as well as a reversing switch guarantee a secure operation.

Capacity: approx. 300 – 400 mink skins per hour

Technical data:

LANA TRW

Dimensions of machine:

width:	80 cms
depth:	100 cms
height:	130 cms,
weight:	approx. 350 kgs

Connected load: approx. 0,75 kW, 400 volts, 3 phase
